
CS-3146 Pipe Coating

Formulated for control and protection from corrosion/rust on metallic components, these non-drying compounds are specially engineered to withstand the most extreme environments. CS-3146 is designed to save you hours, downtime and money without compromising on quality. There is no need for complex preparation of the metal surface — CS-3146 is easy to apply and inspect. CS-3146 is dyed for easy detection.

ATTRIBUTES

- Unsurpassed component protection
- Outstanding protective capabilities
- Very high film strength
- Resistance to water contamination
- Excellent thermal stability
- Wide operating range
- Requires minimal preparation
- Excellent resistance to water washout
- Non-toxic and non-hazardous

TYPICAL PROPERTIES

Lubrication Properties	CS-3146
NGLI Grade	2
Appearance	Dark Green (CS-3146)
Temperature	Non-drip formulation up to 400°F
Compatibility	Compatible with most types of insulation
Shelf Life	Greater than 10 years
Environmental	Non-toxic, non-hazardous formulation
Safety	Please read MSDS prior to handling
Corrosion Test (ASTM B117)	1000 @ 0.025" thickness
Accelerated Weathering (ASTM G-23)	Pass, no corrosion
